

An illustration of a globe in the center, surrounded by a circle of diverse people holding hands. The people are depicted in various colors and styles, representing different ethnicities and genders. The background is a vibrant green with stylized yellow and blue leaves in the corners.

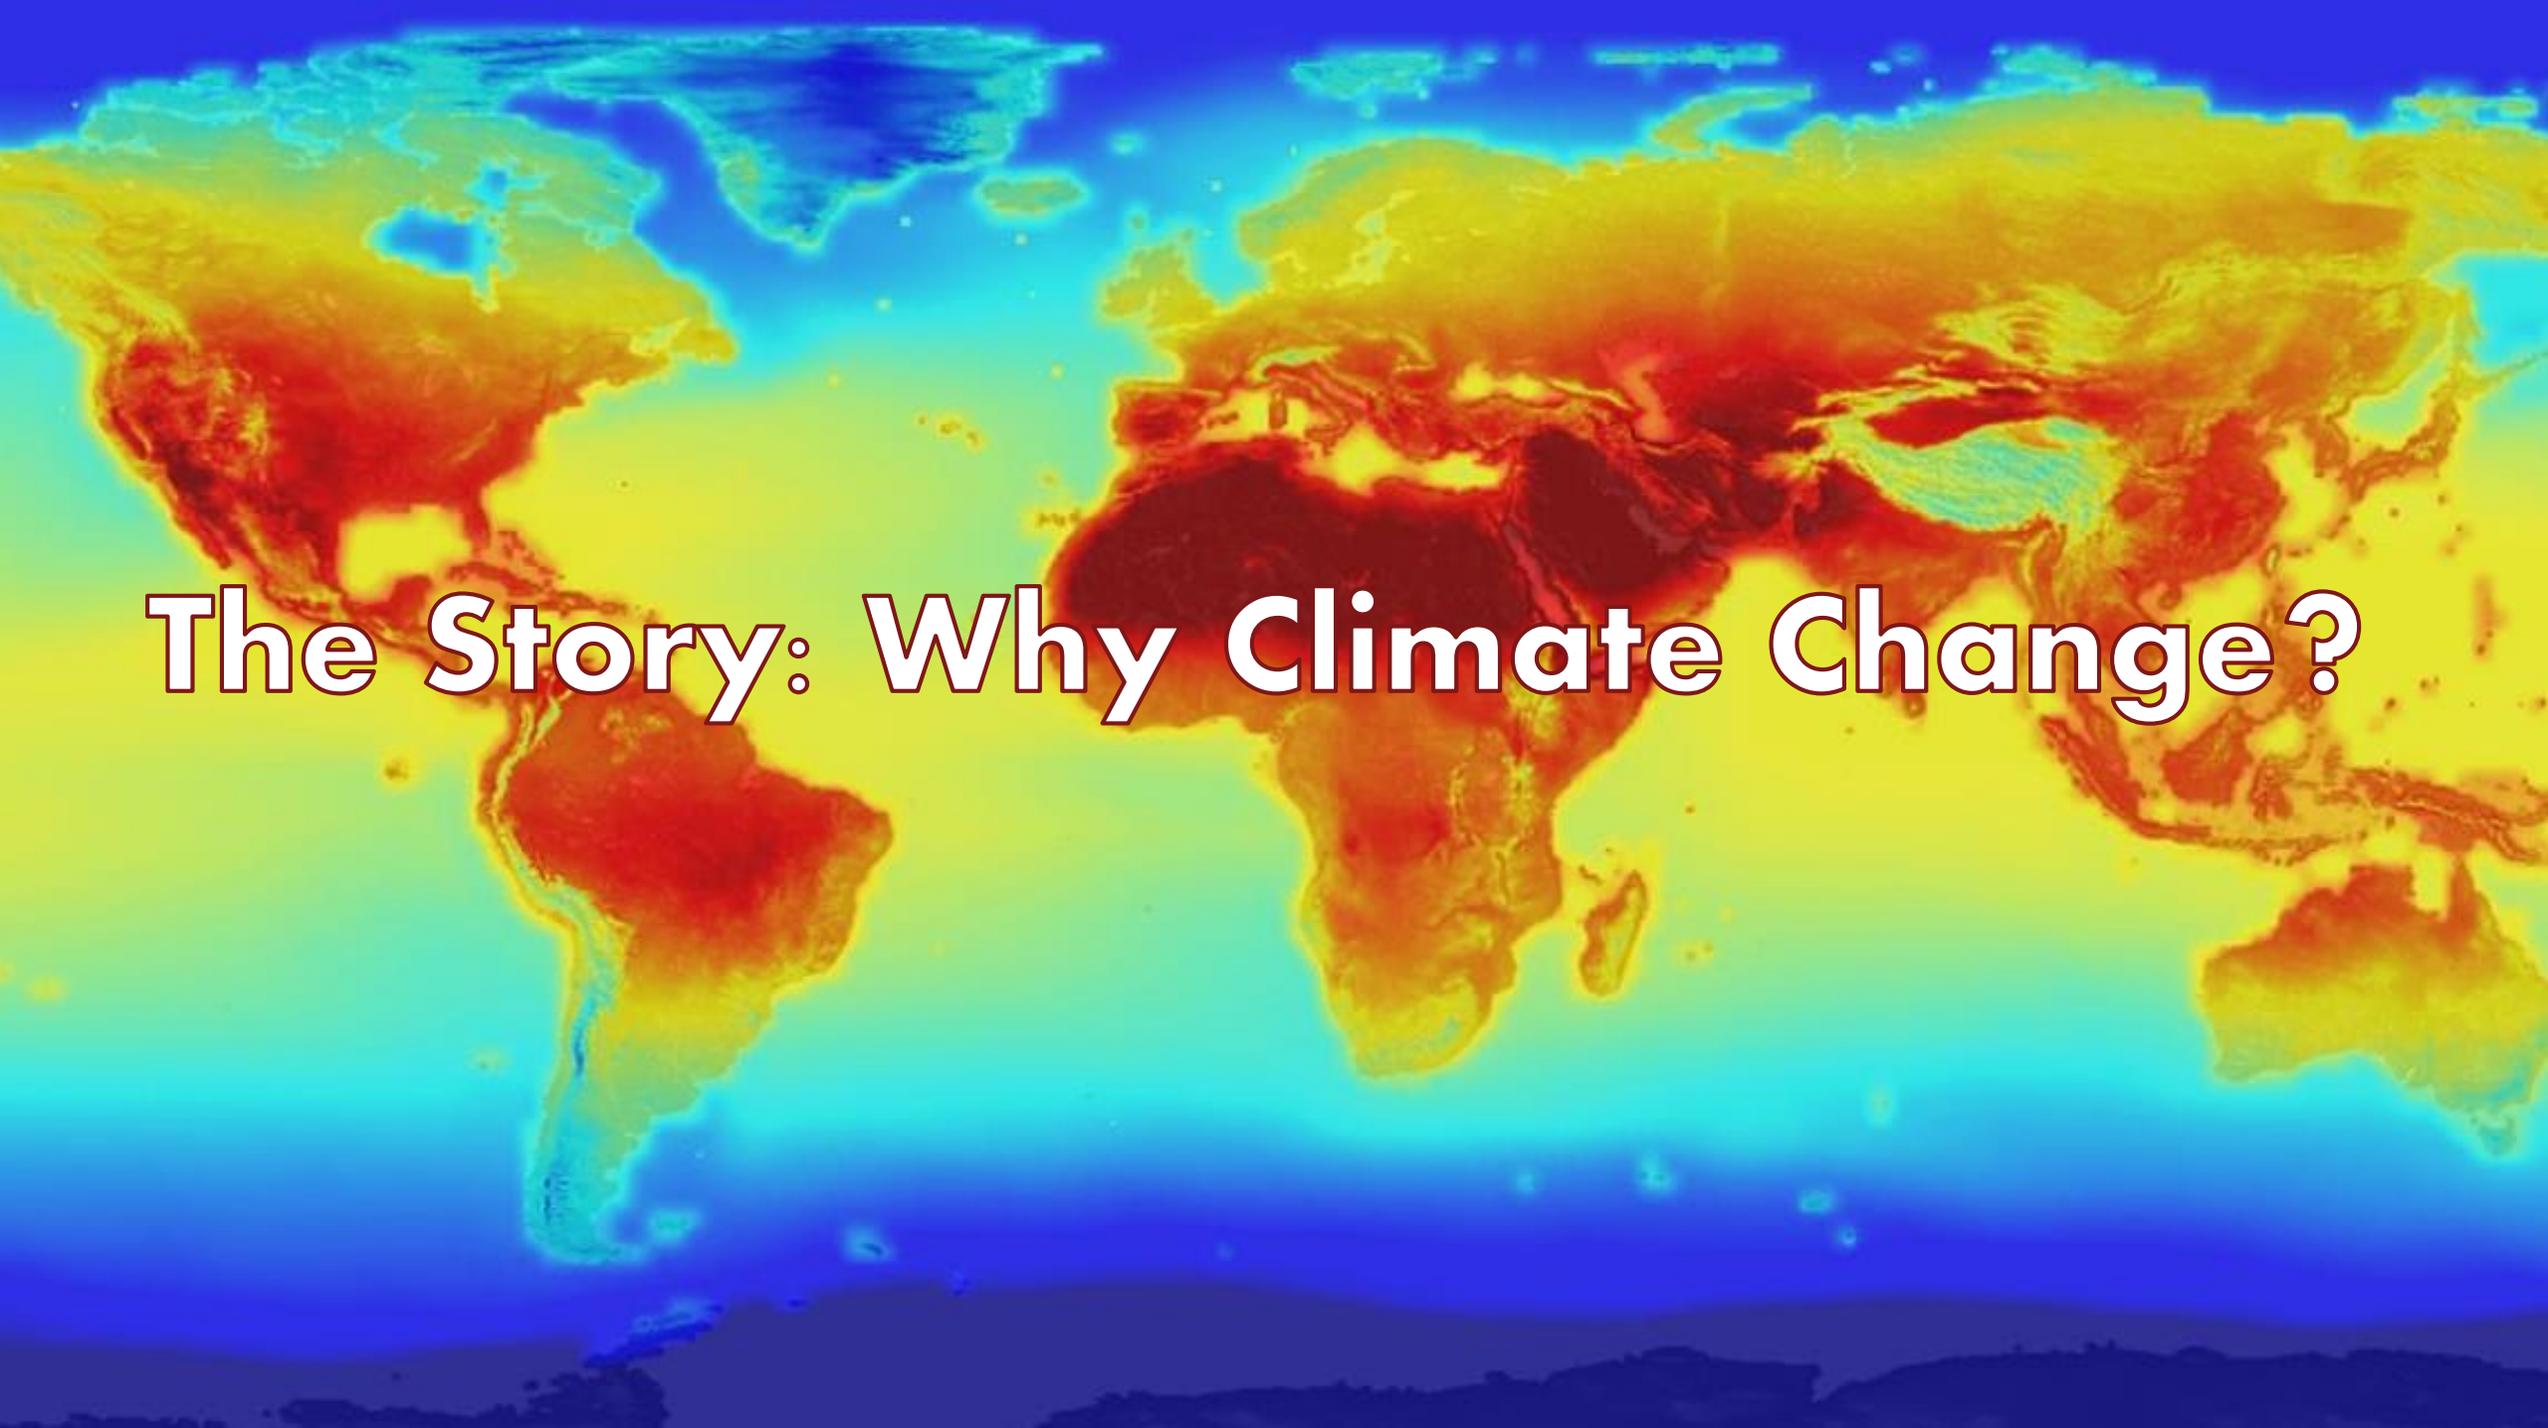

Climate Change, Gender Equality, & Human Rights

By: Nisreen Elsaim

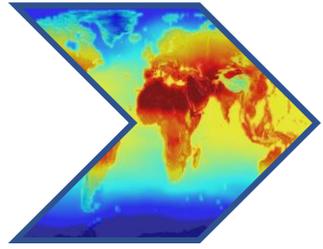

Who am I?

- BSc. in Physics
- MSc. in Renewable energy
- Decade of experience working on climate change (2012 - 2022)
- Chair, UN Secretary General Youth Advisory Group on Climate Change
- Negotiator at UN framework convention on climate change
- Chaired Sudan youth organization on climate change

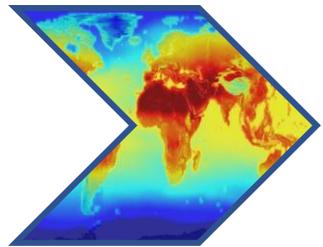

A world map where colors represent temperature. Darker colors (red, orange, yellow) indicate warmer temperatures, while lighter colors (cyan, blue) indicate cooler temperatures. The equatorial region is the warmest, and the poles are the coldest. The text "The Story: Why Climate Change?" is overlaid in the center.

The Story: Why Climate Change?

Climate change has both climatic and non-climatic factors that put a threat on our global world. Some of the climatic factors includes distortion of rainfall season patterns, increase in flood frequency, more intense droughts, and temperature variability. These occurrences risk the very lives of people and biodiversity's all around the world.

Non-climatic factors, on the other hand, include poverty, resource mismanagement, conflicts, and community displacement. Thus, I decided to dedicate my career to solving the climate crisis given the immensity of the issue and the effects it has on our lives and the lives of future generations.

Bridge of Humanity: The Proposal

The Project

Context and Vision:

- Collaborations between organizations are far more successful and rewarding than working individually.
- France and Sudan in particular have a long-standing history of collaboration.
- Therefore, partnerships will combine their unique experiences and perspectives, and will open the door for creative and innovative solutions related to **Climate Change, Gender Equality, and Human Rights**.

Mission:

- To establish a structured and simple communication channel for various organizations from Sudan and France to partner together and work on common goals.
- The partnerships will work on 3 key areas; Climate Change, Gender Equality, and Human Rights.
- Proposed projects aims to bring together different skills and expertise to work together and achieve a collective impact.

The Plan

Association

A physical association will be formed in France, which will facilitate the various activities of the network, engage in work with the partners, overlook the funding, and resolve any technical or general issues which may arise.

Exchange Program

This hybrid program will create opportunities for participants to learn, prosper, and work with one another to solve shared problems. Member organizations will experience first-hand the issues which host members deal with on a daily-basis.

Collaborative Projects

Production of successful collaborative projects, initiatives and campaigns related to Climate Change, Human Rights and Gender Equality. Partnering organizations will be able to communicate via website and access more opportunities.

Platform

A website that will act as a communication source between organizations that are willing to join partnerships. It will provide them with information about the program, its' benefits, and display the profiles of member organizations.

Thank You
